[1] Important Instructions

1. **Carriage and taxes :** The rates are inclusive of carriage of 8 kilometers from the place of issue or the nearest place of availability. Local taxes are also included in the rates of materials, taken into account in working out the rates of the items. If extra cartage is required, it should be paid at the rates specified for carriage beyond 8 kilometers (5 miles). The rate, are however, not inclusive of toll paid on bridges. If any such toll charges have to be paid, the same may be paid extra to contractor after due verification.
2. **Specification:** The items entered in this schedule are to be executed according to the Public Works Department C.P.W.D/NBO/IRC Detailed specifications.
3. **Interpretation of Schedule of Rates :** Shall be as W.R.F. G.P.W. form-9 for other contract documents as per Communication vide Chief Engineer's circular No. 19-PW/45M-58, dated April 20, 1964. conditions of contract.
4. **[a]** The Executive Engineers are requested to mention the names of the approved quarries in the special conditions for the approved stone and approved coarse sand to avoid any ambiguity at later stages during execution.

[b] Ribbed Tor Steel : Ribbed-tor-steel should conform to IS-1786-1979 or its latest edition.
5. **Chapter IV : Earth work and excavation :**

[a] Lead is measured from the centre of the area of excavation to the centre of the bank of spoil heap. Earthwork in excavation of foundation is calculated by taking the dimensions of each trench. Filling in trenches after the construction of foundation is inclusive in the rate. Earth filling in plinth is calculated by taking the internal dimension in between plinth wall, and height is taken after deducting the thickness of floor.

[b] Rate as per schedule items 252 in chapter IV (Earthwork) is to be followed only with the written approval of the Executive Engineer and after his inspection of site.
6. **Chapter VI : Brick work :** Rates including cutting of bricks as necessary for proper bond and for forming all splays, angles etc and also for rounding all exterior and interior angles if so required. The brickwork is to measured in thickness as mentioned in the terms and conditions of the agreement and in its specifications.

7. Chapter IX: Wood work:

[a] **Chaukhat** : Extreme measurement for all scantlings will be made. For example, a chaukhat of section 10cm x 12.5 cm and for 1.2m x 2.1m opening will be measured as 5.40m x 10cm x 12.5cm.

[b] **Leaves**: will be measured closed inside the chaukhat, no allowance being made for over lap. The following tolerance in woodwork shall be allowed as communicated by Chief Engineer's circular No. 7 P.W., dated Lucknow February 24, 1960, as amended vide 36 PW/R-N 10-665-M, dated October 22, 1962.

[i] Tolerance up to 2mm may be allowed in any or all dimentions of the finished wood work without any deduction in measurement of the size specified, unless net measurement are specifically prescribed in any special work requiring exact sizes without any tolerance. No tolerance shall be permissible in the case of thickness of ply.

[ii] Variations exceeding 2mm and up to 8mm. In and or all cross sectional dimensions in the case of wood-work wrought, framed and fixed and upto 4 mm. in the case of thickness of door and window shutters may be permitted but the measurement should then be recorded for the actual sizes, not exceeding the sizes specified, unless exact net sizes are specifically prescribed in any special work.

[iii] Woodwork having variation of more than 8 mm. in cross-sectional dimensions in case of wrought wood-work, and more than 4mm. in case of thickness of door and window shutter be rejected unless allowed by the written orders of the Executive Engineer who will record the reasons for the same under intimation to the Superintending Engineer concerned.

[iv] The tolerances and restrictions specified above shall not be applicable to the length of scantilings or to the breadth and height. In case of door and window leaves. they will be same as actual.

[c] **Fitting** : As communicated in Chief Engineer's letter No. 6639 CBRG/72 CW/56, dated December 20, 1963 and 3093/72 PW/56, dated June 4, 1964, the following shall be kept in view for payment of fittings as per S.I.Nos.

(i) The rates provided in these items are for estimating purposes. Fitting with screws should be supplied departmentally, the fixing and adjustment charges are already included in various shutter items.

(ii) The measurement of fixed portion such as fanlights which do not require any fitting are not done for the purpose of payments under fittings.

(iii) Almirah shutters are measured separately and rates worked out by analysis as per actual fitting.

[III]

- (iv) The measurement for fitting in clerestory window shall be done separately and rate worked out on the basis of analysis based on actual cost of fitting.
8. **Chapter X: Mild steel and Iron work :** Bar reinforcement shall be measured in terms of IS-1200 -(Part VIII) - 1967 which read as follows "Bar reinforcement shall be measured by weight in kilograms and shall include cutting to lengths, hooked ends, cranking or bending (Straight or spiral); no allowance shall be made in the weight for rolling margin authorised overlaps shall be measured. Cost of binding wire is included in this item.
9. **Chapter XI : Roof work :**
- [a] Rates provided in the items of R.C.C. and R.B. works are exclusive of the cost of steel to be used and its bending.
- [b] As per Chief Engineer's circular No. 4 P.W. dated April 25, 1967, the R.C.C. items in chajjas and sunshades etc. include construction of drip courses and no extra payment of the same is to be allowed. The Executive Engineers should provide items in bill of quantities accordingly.
10. **Chapter XII : [Plaster and pointing] :** Plaster shall be measured on length and breadth or height of the wall or surface.
- No deduction from area of plaster shall be made for small size openings up to an area of 3.0 Sq. meter such as doors, windows and ventilators, etc. on one face of the wall when both faces are plastered. No extra rate is to be allowed for rounding of corners external and internal junction of roofs and ceilings with walls. In case of plaster on inside and pointing on the outside, no deduction will be made in plaster work, while the entire area of opening will be deducted from pointing work. In case of large size openings the area of the opening will be deducted on both sides, and the actual plaster or pointing done on the pillars, soffits, and jambs shall be measured.
11. **Chapter XV : Painting and Distemping shall be measured as follows:**
- (i) Moulded work of all kinds such as cornices, etc. and doors and windows shall be measured flat.
- (ii) Both sides area of glazed (Ventilators) painted, shall be measured as 1½ time of the single flat area. Expanded metal, iron gates similar work will be measured as ½ of the single area measured flat for area of painting on both sides.
- (iii) Fully glazed shutters (both sides) shall be measured as 1½ times of the area of the opening, while that of wire gauge doors may be one time only.

- (iv) part panelled and glazed shutters (both sides) shall be measured as $1\frac{3}{4}$ times of the area of the opening.
 - (v) Braced and battended shutters (both sides) shall be measured as $2\frac{1}{2}$ times of the area of opening.
 - (vi) Full panelled shutters both sides may be measured as 2 times of the area of the opening.
 - (vii) Iron grating provided in the window may be measured as $\frac{1}{2}$ time of the area of the opening.
 - (viii) "Z" Section windows may be measured as $\frac{1}{2}$ the area of the opening.
12. **Chapter XVI - White and colour washing :** This shall be measured on length and breadth or height of wall or surface, no deduction being made for small size opening up to an area of 3 Sq. meter such as doors and windows and ventilators etc. On face of the wall when both faces are white or colour washed. In case of washing on one face only, half the area of the opening will be deducted in case of large size opening area above 3 Sq. meter such as Verandah, opening will be deducted on both sides and the actual washing done on the pillars, soffits and jambs shall be measured.
13. Contractor's profit has been allowed in all items. If the work is executed departmentally on muster rolls, no deduction for contractor's profit shall be made in the items of labour rates for assessment of output of labour achieved.
14. All items shall be measured as per IS-1200-1964 method of measurement of building works unless otherwise specifically provided in the bond or in above paragraphs.

[II] Extra Conditions for work on Labour rates only

Condition No. 1

It will be necessary for the contractor to make use of the machine i.e. C.C. mixer, lime pan mixer, 10% deduction in rates will be made in case the work is done without use of mixing machines.

Condition No. 2

It will be the responsibility of the contractor for carriage of water upto the site of the work.

Condition No. 3

Wherever the word, fine sand occurs in this schedule of rates, it will mean the sand of fineness modulus 1.25. Sand, which has lower fineness modulus will be blended with coarse sand in suitable proportions to achieve this fineness modulus.

Condition No. 4

For all works executed above G.F. Labour rate will be increased by 5.0% per floor on labour rate component only or 1.0% per floor for over all.

Extra Condition No.

एजेण्डा बिन्दु-1

केन्द्रीय लोक निर्माण विभाग के प्रचलित स्केल्टन को अपनाये जाने के संबंध में।

एजेण्डा बिन्दु-2

केन्द्रीय लोक निर्माण विभाग के भवन कार्य के दर विश्लेषण की भांति उ०प्र० लोक निर्माण विभाग द्वारा भवन कार्य की मदों में 10 प्रतिशत ठेकेदार लामांश एवं 5 प्रतिशत ओवर हेड अर्थात् कुल 15 प्रतिशत की धनराशि अनुमन्य किये जाने के संबंध में।

एजेण्डा बिन्दु-3

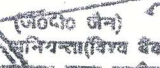

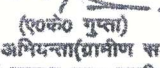

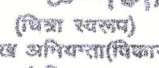

केन्द्रीय लोक निर्माण विभाग में प्रचलित दिल्ली शीड्यूल आफ रेट्स को अपनाये जाने के संबंध में।

उपरोक्त समस्त बिन्दुओं के सम्बन्ध में सर्व सम्मति से समिति द्वारा यह निर्णय लिया गया कि वर्तमान में निर्माण प्रवृत्तियों में आमूल ऋल परिवर्तन हो जाने के कारण लोक निर्माण विभाग का स्केल्टन व्यवहारिक नहीं रह गया है। अतः भविष्य में भवन निर्माण कार्यों हेतु केन्द्रीय लोक निर्माण विभाग के प्रचलित स्केल्टन को अपनाया जाना उचित होगा। CPWD के स्केल्टन में ठेकेदार का लामांश तथा ओवर हेड समाहित है।

समिति द्वारा सर्व सम्मति से यह भी निर्णय लिया गया कि दिल्ली शीड्यूल आफ रेट्स केवल उन्हीं मदों हेतु अपनाया जा सकता है, जिन मदों के लिए उ०प्र० लोक निर्माण विभाग के अधीक्षण अभियन्ताओं द्वारा निर्गत शीड्यूल आफ रेट्स में दरें उपलब्ध न हो।

इटावा मैनपुरी, कुरांवली चार लेन मार्ग का चौड़ीकरण हेतु पूर्व में उच्च स्तरीय तकनीकी समिति बैठक दिनांक-11.06.13 में विनिर्देशों में परिवर्तन हेतु अनुमोदन हुआ था, जो अधिशासी अभियन्ता बी0डी0डी0-1(एन0एच0) के पत्रांक 862/बी0डी0डी0-1(एन0एच0)/40एम0टी0-11/05 दिनांक-14.06.13 द्वारा जारी किया गया था। मुख्य अभियन्ता (मु0-1) ने अपने पत्रांक-57 कैम्प/मु0अभि0(मु-1)/2012 (उ0रत0वै0) दिनांक-28.01.14 द्वारा यह अवगत कराया है कि मुख्य अभियन्ता कानपुर द्वारा उच्चस्तरीय तकनीकी समिति के समक्ष प्रस्तुत अभिलेख में कुछ त्रुटियां थी यथा बी0डी0एफ0 की गणना, एम0एस0ए0 की गणना इत्यादि। मुख्य अभियन्ता (मु0-1) द्वारा पूर्व में दिये गये अनुमोदन को निरस्त करने की संस्तुति की गयी है।

अतः समिति द्वारा/यह निर्णय किया गया है कि पूर्व में उच्च स्तरीय तकनीकी समिति द्वारा अनुमोदित प्रस्ताव दिनांक-11.06.13, जो अधिशासी अभियन्ता, बी0डी0डी0-1(एन0एच0) लखनऊ के पत्रांक 862/बी0डी0डी0-1(एन0एच0)/40 एम0टी0-11/05 दिनांक 14.06.13 द्वारा जारी किया गया था, उसे निरस्त किया जाता है।
